

VisscherHolland - Topseal

TopSeal can be placed directly on the silage. The top surface of the bunker is the most difficult to keep packed; however, this product will ensure the best fermentation.

- ▲ Follows the shape of the silage.
- ▲ Reduces the amount of oxygen in the top.
- ▲ Reduces heating and mould growth.
- ▲ Keeps silage cool during feed-out.

Item no.	Dimension	Color	Role / Pallet
2ON5008	50 x 08	Transparent	46
2ON5010	50 x 10	Transparent	46
